

Author : Sruthy

Environment:

- OS: Windows 10
 - Browser:Chrome
 - Hardware configuration: 8GB RAM
 - Processor: i7
-

Objective:

- To check if the reset button is working
-

Pre-requisites:

- XAMPP Installation(Apache and MySQL to be started)
[Any other web servers can also be used]
-

Test Steps:

1. Click on select image and select the image of your choice
 2. Once the image selection is done,click on any of the function and change it's attributes
 3. Click on Run
 4. Once the output image is got,click on Reset
-

Expected Result:

- The input and output box must be clear of any image
- The radio buttons in the function should go back to its initial state
- The graph should be cleared of any line or curve

- Guideline box must show the initial guideline

Review / Comments:

- The Reset button is working
