Author : Sruthy

Environment:

- OS: Windows 10
- Browser:Chrome
- Hardware configuration: 8GB RAM
- Processor: i7

Objective:

- To check if the linear,non-linear,clipping and window functions are working

---

Pre-requisites:

- XAMPP Installation(Apache and MySQL to be started)
  [Any other web servers can also be used]

Test Steps:

1. Click on 'select image' button and choose the image of your choice
2. Once the image appears on the canvas,exit out of the grid by clicking anywhere on the screen
3. Click on the function of your choice and the associated attributes(For clipping and window start and end values must range between 0 and 255 where start is always less than the end)
4. Click on Run
5. Check if the output image matches with the inputs fed

Expected Result:

- Upon clicking on 'Run',the image is modified according to the inputted values
- The Graph is also modified according to the equation formed from the inputted values

---

Review / Comments:

- The functional buttons are working
